## EXPERIENCE

### CodeWeb

**July 2023 - Aug 2023**

Frontend Developer Intern

I transformed various Figma designs into fully functional and visually appealing websites. My expertise in frontend development contributed to creating immersive and responsive user experiences, enhancing Codeweb's digital presence.

**Technologies worked on:**

ReactJs, Bootstrap, Firebase, HTML, Css

## PROJECTS

### Twitter Clone                    [ **Demo** , **BitBucket** ]

I crafted a feature-rich Twitter clone with secure user authentication, profile updates, posts, likes, reposts, follows, unfollows, image uploads, messaging, user search, account deactivation, SSO with Google, and OTP validation for enhanced security, tailored for personal use.

**Technologies used:**
React.js, Firebase, Bootstrap Grid, Vercel etc.

### Event Management                    [ **GitHub** ]

Plan your dream wedding effortlessly with our React-powered website. Seamlessly manage guest lists, schedules, and explore inspiration for every aspect of your big day. From venue selection to vendor coordination, we simplify the planning process for an unforgettable and stress-free experience.

**Technologies used:**
React.js, Firebase, HTML, CSS
